3 February 2016

Dear Parents of Year 12,

You may have noticed a levy on your school fees bill of $150. I realise that this went out without an explanation and I apologise for that.

You may have heard that the students of Year 12 will be given a laptop to keep. The devices are two years old and still have a period of warranty on them until August 2016. These are laptops that were used by Year Nine students over the last two years and have at least another year of service if not longer. I appreciate the fact that a number of Year 12 students would have purchased their own device, these students can continue to use it at the College. For those who have not purchased their own device, this laptop will allow the College to ensure that every student at the College has a laptop for educational purposes.

The levy is to cover the cost of using the College network and access to it. All students should be able to connect to the College network for educational purposes regardless of the device that they are using. If students encounter any technical difficulties, they should contact the IT Department.

Hopefully this situation will only work to further enhance the educational outcomes for the students.

Best wishes,

Damien Millar
Headmaster
