NOTICE TO PARENTS
Re: Head Lice and Scabies

Dear Parents,

A member of the College community has recently been detected with HEAD LICE and SCABIES. Anyone can get Head Lice or Scabies mainly through direct contact. Head lice and Scabies are a problem in many communities and do not reflect poor hygiene or social status.

We are asking that parents check their child daily for the next few weeks and on a regular basis thereafter. Lice and Scabies are easily treated if caught early.

If you should discover a case of head lice or scabies please notify the Year Coordinator as soon as practical.

Please do not hesitate to contact an Infectious Diseases Officer at the Public Health Unit (telephone: 4734 2022) if you require further information.

Regards

Matthew Brennan
Deputy Headmaster
